# Damp-Warmth

• Wuhan is in the South: thus they are predisposed to diseases of Damp Warmth

 Warm Winter has created an environment that has accelerated its rapid spread

8

		9
General Presentation	<ul> <li>Onset: runny nose, mild sore throat. No fever</li> <li>Incubation is about 2 weeks:</li> <li>Can spread the virus while asymptomatic or mildly symptomatic</li> <li>Pneumonia fever,</li> <li>Coated Tongue:</li> </ul>	

10	
<ul> <li>Use the four methods of dx: looking, asking, listening and smelling, palpation to differentiate pattern and staging</li> </ul>	
• Coronavirus is equivalent to epidemic (疫病) and damp pestilence (湿瘟) in Chinese Medicine. The cause of disease is "dampness toxin"( 湿毒之邪).	key points of treatment

		11
Patient Symptomolog y and Core Disease Mechanisms from Beijing Chinese Medical Hospital Chief Liu Qing- quan	<ul> <li>The tongue will be coated: indicating a damp disease</li> <li>sluggishness, fatigue, poor appetite, nausea, chest fullness, stuffiness and rigidity below the heart and sloppy stool.</li> <li>Most all patients present with dry and sore throat and some also suffer from dry cough with minimal phlegm.</li> <li>Lasts 5-7 days. low or no fever: will generally recover</li> </ul>	

		12
Patient Symptomology and Core Disease Mechanism	• If fever spikes within 2-3 days, then it will progress towards respiratory distress, low oxygen levels, and large scale lung effusion

Clinical Treatment Staging	<ul> <li>18</li> <li>Mid Stage: Epidemic Lung Block <ul> <li>persistent body heat or cold and heat, cough and sputum, or yellow sputum, Bloating and constipation. Chest tightness, shortness of breath, cough and wheezing, asthma when moving. Red tongue and yellow fur slippery pulse.</li> <li>Xing rén 10g, shěngshígão 30g, guã lóu 30g, shěng dà huáng</li> <li>Gg(hòu xià), shěng zhì má huáng gè Gg, ting lì zi 10g, táo rén 10g, cão guõ, 6g, bīng láng</li> </ul> </li> </ul>

Hubei Province Integrated Chinese\West ern Medicine Hospital Critical Viral Respiratory Disease Formulas  This new coronavirus pneumonia roughly approximates Chinese medicinés "warm disease" or "epidemic disease" category. In clinical practice, the patient may present with or without fever, fatigue, soreness of the muscles, feeling of heaviness in the body. poor appetite, greasy tongue coating showing the pathogen is in the exterior, most patients have cough, chest oppression, pathing and \or urgent breathing. The fundamental pathogenic factors are dampness and heat. Clinically we need to consider the upper and middle burner for our primary treatment strategy, paying attention to latent heat, and damage to qi and yin. Specific patterns and treatment strate as follows:

22

#### Lung\Spleen Qi\Yin Dual Vacuity Pattern Formula: Liu Junzi Tang w\ Modified Sheng Mai San or Dong-yuan's Modified Qing Shu Yi Qi Tang

ren shen 12g Panax ginseng (人参)	bai zhu 15g Atractylodes macrocephalae (白朮)	sheng gan cao 6g Glycyrrhiza sp., raw (生 甘草)	ta banxia 10g Pinellia ternata, processed w\ licorice & lime (法半夏)
chen pi 12g Citrus reticulata (陳皮)	maidong 20g Ophiopogon japonicus (夢冬)	wuweizi 15g Schisandra chinensis ( 五味子)	shen qu 30g Massa fermentata (神曲)
sheng shan zha 20g Crataegi pinnatifida (生山楂)

### Guangdong Province: Chinese Medicine Protocol for Pneumonia Due to Novel Coronavirus

Based on the particular epidemiological features of pneumonia caused by novel coronavirus in Guangdong Province, along with the clinical presentation and clinical features of its progression, it fits the characteristics of "pestilent disease" or "warm disease" in Chinese medicine. When there is externally-contracted pestilent qi, the disease moves from the exterior to the interior, and generally follows the patterns of moving from upper to middle to lower burners and through the wei-qi-ying-xue levels. The climate in this area is damp and humid, and pestilent qi easily mixes with this dampness, first attacking the lung wei-defense level, particularly in patients with a weak spleen and stomach. If the upright, healthy (zheng) Qi cannot defeat the deviated, unhealthy (xie) (qi], then the deviated toxin (evil/pathogenic toxin) will move to the interior and transform into heat, harming the fluids (jin) and using-up the humors (ye), sometimes to the point of scorching the ying qi and agitating the blood. When the latter happens, this can be directly transmitted to the pericardium and create a critical situation. The main disease factor is (cause) is damp-heat with pestilent toxin, and the pathological features are "dampness, heat, stasis, toxin, and vacuity."

<ul> <li>Symptoms: fever; cough; copious, thick, yellow phlegm; chest oppression; wheezing; thirst; foul breath;</li> </ul>	sheng mahuang 8g Ephedra sp., honey mix-fried (炙麻黃)	xing ren 12g Armeniacae amarum (杏仁)	sheng shi gao 30g Gypsum, unprocessed (生石膏 )	sheng dahuang 10g Rhei sp., raw (生大黃)
constipation and distention in the abdomen; dark, red tongue with thick, yellow, turbid coating; slippery, rapid	gualouren 30g Trichosanthis kirilowii (瓜蔞仁)	tao ren 10g Prunus persicae (相仁)	chi Shao 15g Paeonia ovata (草果)	tinglizi 20g Eruca sativa (葶苈子)
pulse or deep and tight pulse Treatment: clear heat and diffuse lung;	huang lian 3g Coptis sp. (黃連)	(市亡) huang qin 10g Scutellaria baicalensis (番苓)	sangbaipi 10g Morus alba (桑白皮)	chonglou 10g Paris sp. (重樓)
